Perjeta and the Compatibility of In-Line Filters

This article responds to your request for information on Perjeta® (pertuzumab) and the compatibility of inline filters.

Compatibility of in-line filters

While in-line filters are not required for use, Perjeta has demonstrated compatibility with the following inline filters

- 0.2 µm polyethersulfone (PES) in-line filter
- 15 μm Nylon in-filter, and
- 200 μm polyamide in-line filter.¹

No data are available for the use of cellulose in-line filters with Perjeta.2

Filter compatibility study

Compatibility of in-line filters were evaluated using an infusion solution of 420 mg of Perjeta, diluted to approximately 1.5 mg/mL in 0.9% NaCl.¹
